## Quality Policy

Lee Brass has been in existence since 1917 and has served both domestic and world markets with high quality, cost competitive products.

### **Industry Leading Quality Products Proudly Made in the USA**

Our top priority is to serve our internal and external customers and ensure that all products meet or exceed their expectations.

Quality is monitored and actions to correct/prevent quality issues are carried out by all Lee Brass employees. Internal audits are conducted to ensure the Quality Policy is applied throughout the organization. Management reviews the results of internal audits and monitors corrective actions as required.

The following principles are the basis of the Lee Brass Quality System:

- Customer Satisfaction - Lee Brass will deliver our products in compliance with all requirements specified by the customer contract and/or purchase order.
- Process Control - Lee Brass will build quality into our processes, which will yield quality products that will meet or exceed customer requirements. Continuous improvements tools and processes are used to reduce variations in our processes and products
- Employee Development - Continual improvement of employee knowledge of the process and product is achieved through training.

While Quality Assurance enables coordination of our efforts, all Lee Brass employees are responsible to maintain product quality.

The information contained in this manual is considered proprietary and confidential. Arrangements can be made for the examination of procedures by customer quality representatives.
